

# SOFTWARE DEVELOPER

## BRISTOL

2019

### The Role

At Curtis Banks, we believe that a business can only be as successful as the people who work for it. Our commitment to encourage employees to take responsibility for their career, encouraging them and offering opportunities for advancement, is an integral part of our business strategy.

As a Software Developer, you will design and develop new web functionality; maintain the existing application and website functionality, including bug fixing, deployments, database administration and assisting end users

### You will

- Understand the overall architecture of the Curtis Banks Secure Portal, including its server installation environment.
- Work closely with the Business Analysts in the change team to translate requirements, use cases, and ideas from the business, putting them into working web applications under guidance
- Work within the boundaries of the software release life-cycle, including delivery and implementation of releases.
- Document solution designs to the specification agreed with the Lead Software Developer and Head of Change.
- Design and develop new web functionality for the Secure Portal and other systems, where appropriate, integrating 3<sup>rd</sup> party software where needed.
- Maintain the existing application and website functionality, including bug fixing, deployments, database administration and assisting end users with technical issues.
- Triage support requests raised by the business.
- Maintain scripting on the web server; assist with debugging, fixing issues with the server environment.
- Provide mentor-ship to junior developers, including helping them to work to best practices.
- Assist the lead software developer and head of change with the estimation of time to complete software projects.
- Comply with the agreed development methodology and standards.

### Skills and Experience
