Insurance claims in the last 5 years

To avoid underinsurance, the insurer recommends a formal Reinstatement Cost Assessment (RCA) is completed at acquisition, to ensure it is appropriately insured at outset, and every three years thereafter. If the property is insured on the block insurance policy and a formal RCA is not obtained at acquisition, the 'Average Clause' will apply in the event of any claim being made. Please see the Property Insurance Notes on our website for further details of the 'Average Clause'.

Please let us know if you wish to instruct a formal RCA. We can share details of a third party provider. If you wish to proceed without obtaining a formal RCA at acquisition, please confirm by ticking the box below:

I consent to proceed without a formal RCA at acquisition and acknowledge that if the property is insured on the block insurance policy, the 'Average Clause' will apply in the event of any claim.

Please be aware, if the property is insured on the block insurance policy, once it has been held in the SIPP for three years we will arrange for an RCA to be instructed at this point and every three years thereafter, via our chosen provider. This is to ensure compliance with the insurance policy. We will contact you in relation to this. Your SIPP will be responsible for the cost of any RCA completed.

Appendix A - Additional information

We have summarised some of the main requirements as well as highlighting some particular features of a SSAS with Curtis Banks.

Age

There is no age restriction. However, careful consideration should be given to individual circumstances. For instance, if the purchase of an annuity is a likelihood or serious ill health is an issue an illiquid asset such as property may not be suitable.

Types of property

Freehold, leasehold and commonhold property interests are all acceptable, although leasehold and commonhold properties require more careful consideration at the outset as these may involve unacceptable obligations.

Property taxes

Stamp duty land tax (Land and Building Transaction Tax in Scotland) may be payable on a property purchase although none would be charged on a property transfer from another pension scheme.

If the property being purchased is VAT elected, a pension fund must pay VAT just like any other purchaser, although this can usually be recovered in full. Once acquired any capital appreciation realised by the pension fund is free of tax as is any rental income generated by the property.

Joint ownership

Member trustees can use the SSAS to buy a property as a joint investment. Ownership of the asset will be apportioned according to the contributions made; it is not necessary for each member trustee to have an equal interest in the property. A Declaration of Trust agreement is required between all parties setting out the terms of the arrangement. We can also purchase a property jointly with third parties. Please contact us for further information.

Connected persons

Member trustees can ask us to enter into transactions directly or indirectly with themselves, their business, their partners, their family or any person 'connected' with them. Such transactions have to be undertaken on an open market valuation basis. This type of transaction is likely to appeal particularly to professional practices and small businesses which currently own their commercial premises.

Transfers from other pension funds

It is possible to transfer a property from an existing pension provider to a SSAS with Curtis Banks. We will need to be sure that the property is an allowable investment, that any mortgages on it are in accordance with regulations, and that there are no unacceptable liabilities attached to the property. This will require a solicitor title and carry out the normal environmental checks.

Fixture and fittings

It is only property - generally speaking the bricks and mortar - which is an allowable investment. Fixtures that are considered to be part of the property can be purchased but not fittings which must be acquired separately.

Purchase at auction

If you are looking to purchase a property at auction, it is imperative that our SSAS Team are involved in good time in order to complete our property due diligence and ensure that any liquidity is in place before you submit any bid. Properties acquired at auction are restricted to cash only transactions. A successful bid will result in a legal commitment to buy. Contracts for the purchase will be exchanged at the auction and you will have to do this personally as we will not be present at auction. This means you will also need to fund the deposit personally, which will later be reimbursed to you at completion. You will need to ensure that the contract states that the purchase can be completed in the name of all of the trustee(s) including Colston Trustees Limited.

Property development

Development of the property or capital improvements will normally be effected by the trustees only as the property owner. If there is an existing tenant the improvement may well result in a rent increase.

VAT

This is a complicated area. If the trustees purchase a VAT elected property and have to pay VAT on the purchase price, then by making an election for VAT purposes, the trustees are able to get the VAT back in almost every case. However, this will not be so if the property is let back to the member's business where the business is exempt or partially exempt from VAT. If we elect a property for VAT, the rent will attract VAT and VAT will also be chargeable on the sale price when the property is eventually sold.

Borrowing

The maximum borrowing permitted is equal to 50% of the net asset value of the whole SSAS immediately before the new property is acquired. Existing mortgages have to be catered for within the 50% figure. Borrowing while in drawdown is permitted as is borrowing for VAT purposes although this must also be accommodated within the 50% borrowing limit. Borrowing up to 50% of the net fund value to develop the property is also permitted. The terms of borrowing should be non recourse. In other words, the trustees should have no personal liability for that borrowing.

Realisation

There are a number of reasons why a property may need to be realised. The most common of these is to help fund an individual member's benefits on retirement. However, flexi-access drawdown provides income flexibility and avoids the need to realise a property investment immediately. But, if benefits are to be provided through purchasing an annuity, the assets of the SSAS may need to be sold. As a property is an illiquid investment steps should be taken to ensure timely disposal.

Asbestos and disability requirements

There are regulations regarding asbestos and commercial property. There are also regulations requiring premises to comply with disability discrimination laws. All these requirements fall on the person liable for the upkeep of the property. In most cases this will be the occupying tenant. When acquiring a commercial property it is prudent to ensure that the premises comply with the various regulations as the cost burden could fall upon the SSAS if the premises fall vacant or if the tenant is not responsible for upkeep.

Leases

When purchasing a property subject to an existing lease we will require a report from the solicitor confirming that the lease does not contain any unacceptable obligations. If a vacant property is acquired and a new lease is granted to an incoming tenant, the lease must be on normal full repairing and insuring terms. Where that lease is granted to a scheme member's business, we require an independent valuer to advise on the principal terms of the proposed lease.
